(54) Title: METHOD TO USE AN EMULSIFIED MATERIAL AS A COATING

(57) Abstract: The invention relates to a novel method to use an emulsified material as a surface coating comprising the steps of: (a) applying an emulsified material to a surface of a substrate and (b) drying or allowing to dry the emulsified material as a surface coating on the substrate. The method allows for the precision application of the emulsified material with increased viscosity onto a surface. Additionally, the emulsified material surface coating can easily be removed if desired.
